Advice 6946-E

(Pacific Gas and Electric Company ID U 39 E)

Public Utilities Commission of the State of California

Subject: Electric Rate Change Effective June 1, 2023

Purpose

Pacific Gas and Electric Company (PG&E) submits this Tier 1 advice letter to update its electric rates and tariffs effective June 1, 2023, to implement various revenue requirement changes and a rate design change to PG&E's residential time-of-use rate schedule E-TOU-C, approved by the California Public Utilities Commission (CPUC or Commission). This advice letter contains tables of proposed average rates and revenues in Attachment 1; an average residential rate and bill impact summary table in Attachment 2; and final tariffs in Attachment 3.

Background

PG&E submits this advice letter to change electric rates effective June 1, 2023, to implement various Commission-approved revenue requirement changes. As a result of the changes described below, the total authorized revenue requirement in rates will decrease by a total of \$404.9 million, or 2.4 percent, effective June 1, 2023. The change in revenue requirement results in a decrease to the system average bundled rate of 0.52 cents per kilowatt-hour (kWh), or 1.8 percent, and a decrease to the Direct Access (DA) and Community Choice Aggregator (CCA) average rate of 0.50 cents per kWh, or 3.4 percent.¹

In addition, through this advice letter PG&E implements a rate design change to residential time-of-use schedule E-TOU-C pursuant to Decision (D.) 21-11-016 in PG&E's 2020 General Rate Case (GRC) Phase II proceeding which orders PG&E to adjust the distribution and generation rate differentials between peak and off-peak time periods.²

¹ The average rate for DA and CCA customers is for PG&E provided services only and excludes the generation component provided by DA and CCA service providers.

² Application 19-11-019.

Revenue Requirement Changes

1. End of Recovery of PG&E's 2018 Catastrophic Emergency Memorandum Account (CEMA)

In compliance with CPUC Decision D.22-03-011, PG&E implemented the 2018 CEMA distribution revenue requirement of \$332.4 million (which includes \$35 million in interest) on June 1, 2022 through Advice 6603-E/E-A to be recovered from customers over a twelve-month period. As the twelve-month amortization period will end on June 1, 2023, PG&E is removing the electric distribution revenue requirement of \$332.4 million from electric Distribution rates in this advice letter.

2. Recovery of 2023 Market Access Program (MAP) Costs for Enhanced Summer Reliability

On November 15, 2022, PG&E submitted Advice 4681-G/6762-E requesting \$18.2 million for program implementation and incentive costs for the 2023 MAP program. On December 19, 2022, the Commission approved that advice letter, effective December 16, 2022. In this advice letter, PG&E is implementing the \$18.2 million revenue requirement approved in Advice 4681-G/6762-E for recovery in Public Purpose Program rates.

3. Recovery of the Risk Transfer Balancing Account (RTBA)

Advice 4721-G/6867-E, filed on March 2, 2023, requested the recovery of \$99.0 million for the cost of excess liability insurance above \$1.4 billion in coverage obtained by PG&E from third-party providers in 2022.³ The Commission approved AL 5721-G/6867-E on April 17, 2023. In this advice letter, PG&E is implementing the adopted electric distribution revenue requirement of \$39.8 million for recovery through electric Distribution rates.

4. End of the Adjustments to Revenue Requirements to Comply with Internal Revenue Service (IRS) Private Letter Rulings

On June 1, 2022, PG&E implemented the revenue requirement adjustment approved through Tier 2 Advice 4579-G/6513-E which adjusted revenue requirements and rate base to comply with IRS rulings on the correct treatment of Cost of Removal/Negative Net Salvage under the tax normalization rules and the Average Rate Assumption Method.⁴ As the twelve-month amortization period will end on June 1, 2023, PG&E is removing the electric distribution revenue requirement of \$130.5 million from rates in this advice letter.

³ PG&E submitted this request in accordance with the 2020 General Rate Case (GRC) Settlement approved in Decision (D.) 20-12-005 Ordering Paragraph 1.

⁴ This revenue requirement change was implemented in rates through Advice 6603-E/E-A.

Rate Design Changes

In this advice letter, PG&E is implementing a rate design change to residential Schedule E-TOU-C stemming from the all-party Residential Settlement adopted by D.21-11-016 in PG&E's 2020 GRC Phase II proceeding.⁵ More specifically, the Residential Settlement prescribed changes to the peak versus off-peak price (POPP) differentials for the distribution and generation rate components under Schedule E-TOU-C to occur in three steps. Per the Residential Settlement, the "Step 1 Change Period" is to occur beginning on the first month after a 12-month "No Change Period" has ended and continuing for the next twelve months. The No Change Period, in turn, is defined as the period from the time the Commission issues a decision in PG&E's 2020 GRC Phase II (which occurred in November 2021) until twelve months after the date the last cohort of customers has been defaulted to Schedule E-TOU-C. Since the last cohort of PG&E's customers were migrated to default TOU rates in May 2022, PG&E is implementing the Step 1 Change Period changes to the POPP differentials in this advice letter, effective June 1, 2023. The new E-TOU-C rates are shown in the table below and reflect the Step 1 Change Period POPP differentials of \$0.08344 and \$0.02835 per kWh agreed to in the Residential Settlement.⁶

Energy Charges (\$/kWh)	Rates (Eff. 6/1/23)
Summer	
Peak	\$0.50938
Off-Peak	\$0.42594
POPP Differential	\$0.08344
Winter	
Peak	\$0.40667
Off-Peak	\$0.37832
POPP Differential	\$0.02835

PG&E will implement the Step 2 Change Period revisions to the E-TOU-C POPP differentials in June 2024.

⁵ See Motion of Pacific Gas and Electric Company for Adoption of Residential Rate Design Supplemental Settlement Agreement dated March 29, 2021.

⁶ The \$0.08344 per kWh summer POPP differential in the total rates is, in turn, made up of \$0.06344 and \$0.0200 per kWh differentials in the generation and distribution rates, respectively. The \$0.02835 per kWh winter POPP differential in the total rates is made up of generation and distribution POPP differentials of \$0.02503 and \$0.00332, respectively.

Tariff Revisions

PG&E is submitting final tariffs in Attachment 3 for this consolidated electric rate change effective June 1, 2023.

1. APPLICABILITY: **Option R for Standalone Storage:** The Option R rate is available to qualifying customers taking Bundled, DA and CCA service under Schedule E-20. Eligible customers system must have a minimum discharge capacity equal to or greater than 20 percent of the customer's annual peak demand, as recorded over the previous 12 months to be eligible for Option R. Discharge capacity for Option R will be calculated using the same method as that used for Option S. For additional Option R details and program specifics, including the participation cap, see Sections 3 and 16.

Option R for Renewable Distributed Generation Technologies: The Option R rate is available to qualifying customers taking Bundled, DA or CCA service under Schedule E-20. Eligible customers system with solar, wind, fuel cells or other eligible onsite renewable distributed generation technologies as defined by the California Solar Initiative program (CSI), or Self Generation Incentive Program (SGIP), customers with behind-the-meter storage paired with such renewable distributed generation and Permanent Load Shifting (PLS) technologies. Eligible renewable generation systems and PLS systems must have a net renewable generating capacity or load shift capacity equal to or greater than 15 percent of the customer's annual peak demand, as recorded over the previous 12 months. For additional Option R details and program specifics, including the participation cap, see Sections 3 and 16.

RESIDENTIAL TIME-OF-USE SERVICE

Sheet 2

RATES: Total bundled service charges are calculated using the total rates below. On-peak, part-peak, and off-peak usage is assigned to tiers on a pro-rated basis. For example, if twenty percent of a customer's usage is in the on-peak period, then twenty percent of the total usage in each tier will be treated as on-peak usage. Customers on this schedule are subject to the delivery minimum bill amount shown below applied to the delivery portion of the bill (i.e. to all rate components other than the generation rate). In addition, total bundled charges will include applicable generation charges per kWh for all kWh usage.

Customers receiving a medical baseline allowance shall pay for all usage based on the rates shown below, and shall not pay the Wildfire Fund Charge. Customers receiving a medical baseline allowance shall also receive a 50 percent discount on the delivery minimum bill amount shown below.

Direct Access (DA) and Community Choice Aggregation (CCA) charges shall be calculated in accordance with the paragraph in this rate schedule titled Billing.

TOTAL BUNDLED RATES

Total Energy Rates \$ per kWh	PEAK	PART-PEAK		OFF-PEAK

Total Meter Charge Rate (\$ per meter per day)			\$0.25298			
Delivery Minimum Bill Amount (\$ per meter per day)			\$0.37612			
California Climate Credit (per household, per semi-annual payment occurring in the March [†] and October bill cycles)			(\$38.39)			

Total bundled service charges shown on customer's bills are unbundled according to the component rates shown below. Where the delivery minimum bill amount applies, the customer's bill will equal the sum of (1) the delivery minimum bill amount plus (2) for bundled service, the generation rate times the number of kWh used. For revenue accounting purposes, the revenues from the delivery minimum bill amount will be assigned to the Transmission, Transmission Rate Adjustments, Reliability Services, Public Purpose Programs, Nuclear Decommissioning, Competition Transition Charges, Energy Cost Recovery Amount, Wildfire Fund Charge, and New System Generation Charges based on kWh usage times the corresponding unbundled rate component per kWh, with any residual revenue assigned to Distribution.*

[†] Pursuant to D.23-02-014, disbursement of the April 2023 residential Climate Credit shall begin by March 1, 2023.

* This same assignment of revenues applies to direct access and community choice aggregation customers.

The above commercial CARE discount per kWh by rate schedule shall be updated by PG&E with each future electric rate change based on the overall percentage distribution and generation discount for the residential CARE customer class, and assigned as a residual reduction to the commercial distribution rate component, after the waiver of the Wildfire Fund Charge, Recovery Bond Charge, Recovery Bond Credit, and the CARE Surcharge portion of the PPP rate component otherwise applicable to each commercial rate schedule from Preliminary Statement Part I. Should commercial CARE customers take service on a rate schedule not listed above, PG&E shall use the most appropriate rate schedule currently listed above, until such time as a new corresponding rate per kWh is developed and available for billing purposes with Commission approval.

COMMUNITY CHOICE AGGREGATION AND DIRECT ACCESS: Direct access (DA) and Community Choice Aggregation (CCA) customers shall pay charges for transmission, transmission adjustment rates, reliability services, distribution, public purpose programs, nuclear decommissioning, the franchise fee surcharge in accordance with Schedule E-FFS and the Vintaged Power Charge Indifference Adjustment (PCIA), as provided in the otherwise applicable rate schedule and Schedule DA CRS (Cost Responsibility Surcharge) or Schedule CCA CRS (as applicable), except that distribution and public purpose program charges will be discounted, and Wildfire Fund Charge, Recovery Bond Charge, and Recovery Bond Credit waived as described above.

* The Rules referred to in this schedule are part of PG&E's electric tariffs. Copies are available at PG&E's local offices and website at <http://www.pge.com/tariffs>.

**** Wattage based on total consumption of lamp and driver. Customer may be required to provide verification of total energy consumption of lamp and driver upon request by PG&E.

***** Assumptions consistent with tariff, based on 4100 hours of operation for a full year; mid-point in range established by deducting 2.5 watts from highest wattage in range. The energy use calculation is:
(high wattage in range-2.5 watts)x(4,100 hours/12 months/1000)

RATES: (Cont'd)

DEFINITION OF SERVICE VOLTAGE: (Cont'd)

The Standby Reservation Charges for customers who have paid for the total cost of the service transformers as special facilities under electric Rule 2 are determined by the voltage at the high side of the service transformer. All other charges will be billed on the voltage level at the low side of the service transformer.

PG&E retains the right to change its line voltage at any time, after reasonable advance notice to any customer affected by the change. The customer then has the option of changing its system to receive service at the new line voltage or accepting service at the initial voltage level through transformers supplied by PG&E.

DEFINITION OF MAXIMUM DEMAND:

The real (kW) and reactive (kVAR) demands billed under this tariff will be averaged over each 15-minute interval. "Maximum demand" (real and reactive) will be the highest 15-minute interval average for the billing month. If the customer's use of electricity is intermittent or subject to severe fluctuations, a 5-minute interval may be used. If the customer has any welding machines, the diversified resistance welder load, calculated in accordance with Section J of Rule 2, will be considered the maximum demand if it exceeds the maximum demand that results from averaging the demand over 15-minute intervals.

Total bundled service charges are calculated using the total rates shown below. DA and CCA charges shall be calculated in accordance with the paragraph in this rate schedule titled Billing.
