SCHEDULE TOU-A GENERAL SERVICE - TIME OF USE SERVICE

SPECIAL CONDITIONS

- 1. Appropriate Electric Metering: A fifteen-minute interval data recording meter with related telecommunications capability, compatible with the Utility's meter reading, time-of-use billing, and telecommunications systems.
- 2. Basic Service Fee Determination: The basic service fee will be determined each month based on the customer's Maximum Annual Demand.
- Billing: A customer's bill is first calculated according to the total rates and conditions listed above. 3. The following adjustments are made depending on the option applicable to the customer:
 - a. UDC Bundled Service Customers receive supply and delivery services solely from the Utility. The customer's bill is based on the Total Rates set forth above. The EECC component is determined by multiplying the applicable EECC price for this Schedule during the last month by the customer's total usage.
 - Direct Access (DA) and Community Choice Aggregation (CCA) Customers purchase energy from a non-utility provider and continue to receive delivery services from the Utility. The bills for a DA and CCA Customer will be calculated as if they were a UDC Bundled Service Customer, then crediting the bill by the amount of the EECC component, as determined for a UDC Bundled Customer, and including the appropriate Cost Responsibility Surcharge (CRS), if applicable.

Nothing in this Schedule prohibits a marketer or broker from negotiating with customers the method by which their customer will pay the CTC charge.

- 4 Compliance with Applicability Provisions: For customers who are demand metered, applicability will be measured by the "20 kW for twelve consecutive months" provision. Applicability will be measured by the "12,000 kWh for twelve consecutive months" provision when demand metering is not available.
- Definitions: The Definitions of terms used in this Schedule are found either herein or in Rule 1. 5.
- 6. Demand Response Programs: A customer may participate in a Utility demand response program unless explicitly prohibited by the demand response program tariff or contract. A customer may not receive more than one incentive payment for the same interrupted/curtailed load kWh reduction. Multiple program participation is governed by SDG&E Rule 41.
- 7. Generator Operation: The operation of a non-utility generator unless expressly authorized by tariff is prohibited.
